

INVESTOR PRESENTATION · 2026

nisd2.eu

Free NIS2 compliance for European SMEs

Turning a €30,000–€80,000 consulting project into an open-source
platform

Cologne · 2026

160,000+ European companies. No affordable compliance tool.

1. NIS2 applies across all 27 EU member states (no transition period)
2. Most affected companies are SMEs: under 250 employees, no CISO, no compliance budget
3. Existing tools: €7,500–€100,000/year.
Consulting: €30,000–€80,000 per project

ENISA estimates 160,000–180,000 obligated entities EU-wide — the majority newly in scope for the first time

REF-09 NIS2-compliance cost comparison

Year 1, SME view

Full consulting project (KPMG / Sopra Steria / Capgemini)

€60k – €200k

Year 1 all-in. Full implementation project 6-12 months. For a 50-person company the larger firms often land at €120-200k; specialised Mittelstand boutiques start at €30-60k. No recurring SaaS component.

Vanta SaaS + necessary consulting

€15k – €60k

Year 1 all-in. License €7,500–50,000 p.a. (NIS2 as add-on, size-dependent) + implementation consulting €5,000–15,000. Vanta delivers the tool, not the policies.

DataGuard bundle + necessary consulting

€15k – €40k

Year 1 all-in. License bundle €10,000–30,000 p.a. (pricing not public) + internal or external implementation hours. Demo wall blocks public comparison.

nisd2.eu (platform + optional partner referral) **our work**

€0 – €12k

Year 1 all-in. Platform free (AGPL-3.0). Optional training tickets €10–300/person. When needed, direct referral to a consulting partner: the SME pays the partner directly for specialist support, typically €5,000–10,000; nisd2.eu earns a commission from the partner's fee.

Sources: business plan §4.3. Consulting rates match typical Sopra Steria / KPMG / Capgemini project pricing. Vanta range from enterprise-sales reports. DataGuard pricing is not public, estimated from market signals. nisd2.eu column: platform free forever (AGPL-3.0), optional paid training tickets.

The platform is the documentation. Free, forever.

- ✓ Requirements register, risk management, supplier portal, incident tracking
- ✓ BSIG-specific (not a generic ISO mapper)
- ✓ Open source (AGPL-3.0), no lock-in, data export always available
- ✓ eIDAS timestamp sign-off, audit-proof log, PDF export for auditors

REF-10

Top-10 NIS2 audit findings, platform coverage

Marc Laneve, ISO 27001 Lead Auditor (March 2026)

Platform module (7/10)

Evidence upload (3/10)

External required (0/10)

#1	No formal information security policy	Platform module	GOV / RSK
#2	No risk analysis or treatment plan	Platform module	RSK
#3	Deficient/missing incident management	Platform module	INC
#4	No business continuity plan	Platform module	BCP
#5	Insufficient supplier control	Platform module	SUP
#6	Weak access control	Evidence upload	ACC (Config-Export)
#7	Missing/insufficient encryption	Evidence upload	CRY (Screenshots)
#8	No cybersecurity governance at management level	Platform module	GOV + \$38 BSIG course
#9	Deficient patch/vulnerability management	Evidence upload	PRO (Tickets)
#10	Insufficient employee training	Platform module	TRN + Partner Affiliate

Result: 7 of 10 findings are addressed directly by platform modules, 3 via evidence upload (screenshots, configuration exports). The platform covers all ten most frequent audit findings. Source: §4.2.5 of the business plan.

Live since Q1 2026. Growing without paid ads.

40.5k

LinkedIn impressions (May 20 week)

BSI enforcement window opens 2026. Inbound CISO + IHK conversations already active.

160,000–180,000 companies obligated across the EU.

REF-02

TAM / SAM / SOM

Market-size pyramid

TAM EU-wide NIS2-obligated entities

160,000–180,000 companies*ENISA / BSI sector FAQs*

SAM EU SMEs (50–250 employees) in NIS2 sectors

135,000–155,000 SMEs*≈ 85% of TAM (NIS2 Recital 12, SME share)*

SOM Paying SME customers Year 3 (via consulting partners)

≈ 400 SMEs*conservative from the current 22-users-per-week trajectory; average commission €900 per referral (m.v.; consulting €1,000–1,500, partner training €250)*

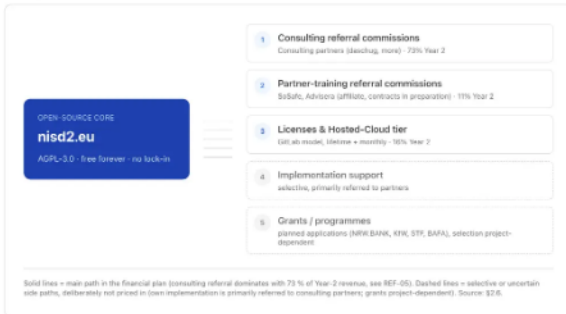

The platform is sector-agnostic and EU-wide replicable; SOM is the paying SME base in Year 3 (Mar 2028 – Feb 2029) via consulting partners, not the platform user base. Platform use stays free forever; the commercial lever sits in referrals to consulting partners. Sources: ENISA, BSI sector FAQs, NIS2 Recital 12, §4.1.

TAM: 160–180k EU entities (ENISA/BSI) · SAM: 135–155k EU SMEs · SOM: ~400 paying customers by Year 3

Free platform. Revenue from what surrounds it.

REF-01 Business Model Flow

Open-source core + 5 revenue channels

Consulting-referral commissions (~73% of Year-2 revenue, avg €1,000–1,500 per referral)

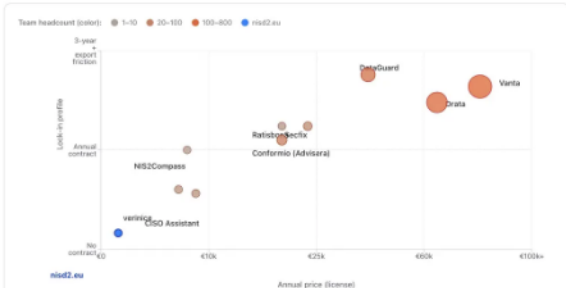

Partner-training referrals: SoSafe, Advisera (~11% of Year-2 revenue)

Licenses + hosted cloud, €49–299/month by company size (~16% of Year-2 revenue)

Nobody else is free, open-source, and BSIG-specific.

REF-03 Competitor positioning

Price × Lock-in · Bubble size = team headcount

Three categories on one chart, not one homogeneous group. Enterprise OSS GRC (CISO Assistant, verinica): structurally interesting but different ICP (technical compliance teams, federal authorities, KRITIS operators). Commercial NIS2 SME SaaS (NIS2Compass, DataGuard, Sectix, Conformio): the direct ICP-match band. Workshop / consulting (Ratistona, SopraKPMG-tier projects): different category of buy. Bubble size = team headcount (log scale), color shifts toward red with team size: Vanta = 800 people, nisd2.eu two. The only true direct ICP competitor is NIS2Compass; the differentiator runs through open source and no lock-in, not through price. Source: §4.2.

MARKET GAP

- ✗ US platforms (Vanta, Drata): €7,500–€100k/year, English, ISO-centric
- ✗ German SaaS (DataGuard, NIS2Compass): demo walls, 3-year lock-in
- ✗ Consulting (KPMG, Sopra Steria): €30,000–€80,000 per project

NISD2.EU

- ✓ Free forever. Open source. No lock-in.
- ✓ BSIG-specific (covers the 20% of NIS2 that ISO 27001 misses)
- ✓ IHK chambers can endorse us (no vendor conflict)

Enforcement starts 2026. The window to build authority is open.

1

Regulation live

NIS2 in force Dec 6, 2025. No transition period.

2

62% unregistered

Most obligated German companies still haven't filed with the BSI.

3

Enforcement starting

First fines and §38 personal-liability cases expected 2026–2027.

4

No market leader

US providers too expensive. German providers closed. Window is open.

5

Channels opening

IHK chambers actively seeking NIS2 material for their 3.5M members.

An open-source platform can build authority now, before the market consolidates.

Break-even May 2027. First Managing Director salary June 2027.

REF-06 Break-even (cumulative)

Quarter end - Source: Sections 8.2 + 8.8

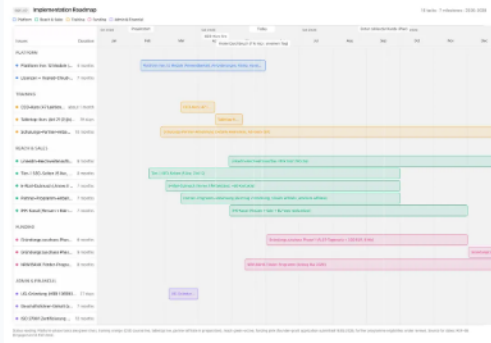

Year	Revenue	Net result
2026 (Mar–Dec, partial)	€3,800	–€9,430
2027 (full year)	€62,200	+€19,698
2028 (conservative)	€110,000	+€17,077

Model assumptions

Conservative path. 50% revenue shortfall scenario: no insolvency. Grants excluded from base case.

Four milestones to market leadership.

Q1 2026

Platform live. 158 users, 76 CEO courses. BSI registration deadline.

Q3 2026

First referral commissions. SoSafe + Advisera affiliate contracts.

Q1 2027

Netherlands + Austria market entry. Hosted cloud tier launched.

Q1 2028

400 paying customers. First employee. €300k+ annual revenue.

Built by people who read the regulation in its original language.

Simon Orzel

Managing Director · 51%

Based in Cologne. 10 years in full-stack B2B software engineering. Former Founding Engineer at EventFirst (Top-5 US VC Funded). Deep expertise in modern webstack, LLM/RAG, and regulatory framework translation. Technical lead and architecture.

Cory Hisey

Co-Founder · 49%

Based in Osnabrück. M.Eng Mechatronics and cyber-physical systems (focus: embedded systems and AI integration). Handles business development, partnerships, and client-facing implementation support.
